

## Empathy map canvas

Use this framework to empathize with a customer, user, or any person who is affected by a team's work.

Document and discuss your observations and note your assumptions to gain more empathy for the people you serve.

## ASL- Alphabet Image Recognition

ASL Alphabet Image Recognition is one such technology. It is designed to identify the ASL alphabet from pictures of hand signs through image categorization. For this project, a machine learning model will be trained to identify hand sign images that match to the 26 letters in the English alphabet, along with three more classes for the signs "space," "delete," and "nothing."
